Dear Mayor and Council of Esquimalt,

I have been looking for a home in Esquimalt, and as you know there is a severe lack of quality homes in our region. While searching for a solution, I came across Corvette Landing and I'm interested in buying a home there.

It is beautiful, forward thinking and a certified "Passive Home." They are even using green materials and building systems created here in BC.

I support these initiatives regardless of whether I eventually become an owner there, and I hope you do too.

I have been told by my Realtor that Council has not supported this building wholeheartedly.

I have also been made aware by my Realtor that some members of Council believe that Corvette Landing is too big for the area. There is an acute housing shortage throughout our region, and Esquimalt is poised to take a leadership position with Corvette Landing. The size of the building is exactly what is needed, particularly in Esquimalt.

On behalf of all those who are affected by our housing crisis I ask for your support in getting Corvette Landing built and occupied as soon as possible.

I will be attending the Public Hearings in support of the Corvette Landing, I look forward to meeting you.

RE: Corvette Landing, Esquimalt.

We are writing today in support of Corvette Landing, the proposed development of eighty-three new homes adjacent CFB Esquimalt for the Admirals Road and Constance Avenue precinct.

Chandos is a supporter of leading design and lean manufacturing principals. This has led us to be leaders in innovative construction and see Corvette Landing as a significant step in the right direction to alleviate the housing shortage, create community around sustainable design, use renewable and sustainable construction materials, and provide significant investment within the Township of Esquimalt.

We understand the project will be constructed of mass wood with a prefabricated portion to support the envelope. In other buildings of this type, home owners are reporting an increase in livability and decreased operating costs when compared to similar concrete buildings. Sequestration of carbon is also a major benefit of mass wood construction.

Chandos supports Corvette Landing, its local focus, its regional positive impact, and the opportunity it will provide your township to house eighty-three new professionals and families, so they can leave the City behind and head just a bit west for a breath of fresh air.

Yours truly,

CHANDOS CONSTRUCTION LTD

Andrew Hull
Director – Business Development
