

Lyall Street Corridor - Complete Street Improvements

Welcome to the Open House!

Municipal Hall (1229 Esquimalt Rd)
Thursday, November 22, 2018 6:30 - 8:30 PM

Project Background & Purpose

PURPOSE

Provide an improved environment within the right-of-way for all street users

COMPLETE STREETS PROJECT AREA

➤ Canteen Road to Head Street

COMPLETE STREETS PRINCIPLES

- Consider all street users
- Balanced approach to street function
- Support vulnerable road users
- Shift to sustainable transportation travel modes
- Improve quality of public space within the right-of-way

Study Area

“What we heard”

Reduce posted speed limit,
drivers are speeding.

Install traffic calming features
to reduce speeding.

Remove some of the on-street parking,
as sometimes vehicles block driveways
and/or affect sightlines.

Improve cyclist safety
by adding separated
bike facilities.

Apply weight restrictions
so that trucks and heavy
vehicles use Esquimalt Rd.

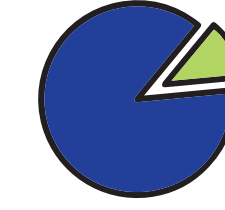

No changes needed.

Feedback from Lyall St Public Survey on potential improvements

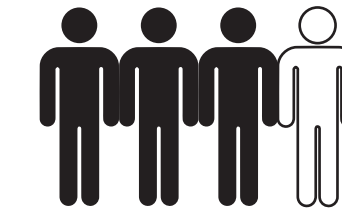

By the Numbers

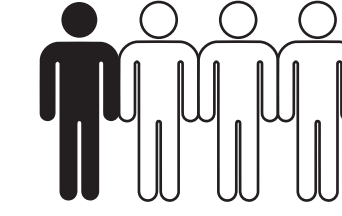

268 Respondents

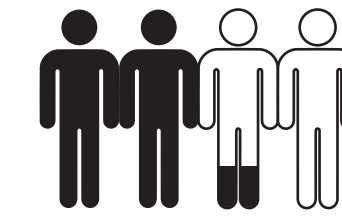

78% live within a 5-min
walk from Lyall St

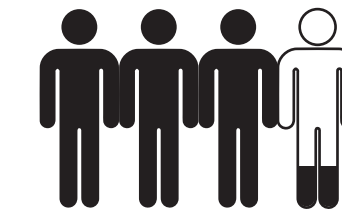

75% of respondents are
using Lyall St as pedestrians

26% of respondents are using
Lyall St for on-street parking

55% of respondents are
using Lyall St as cyclists

80% of respondents are
using Lyall St as motorists

Proposed Improvements

TRAFFIC CALMING MEASURES

Curb Extensions

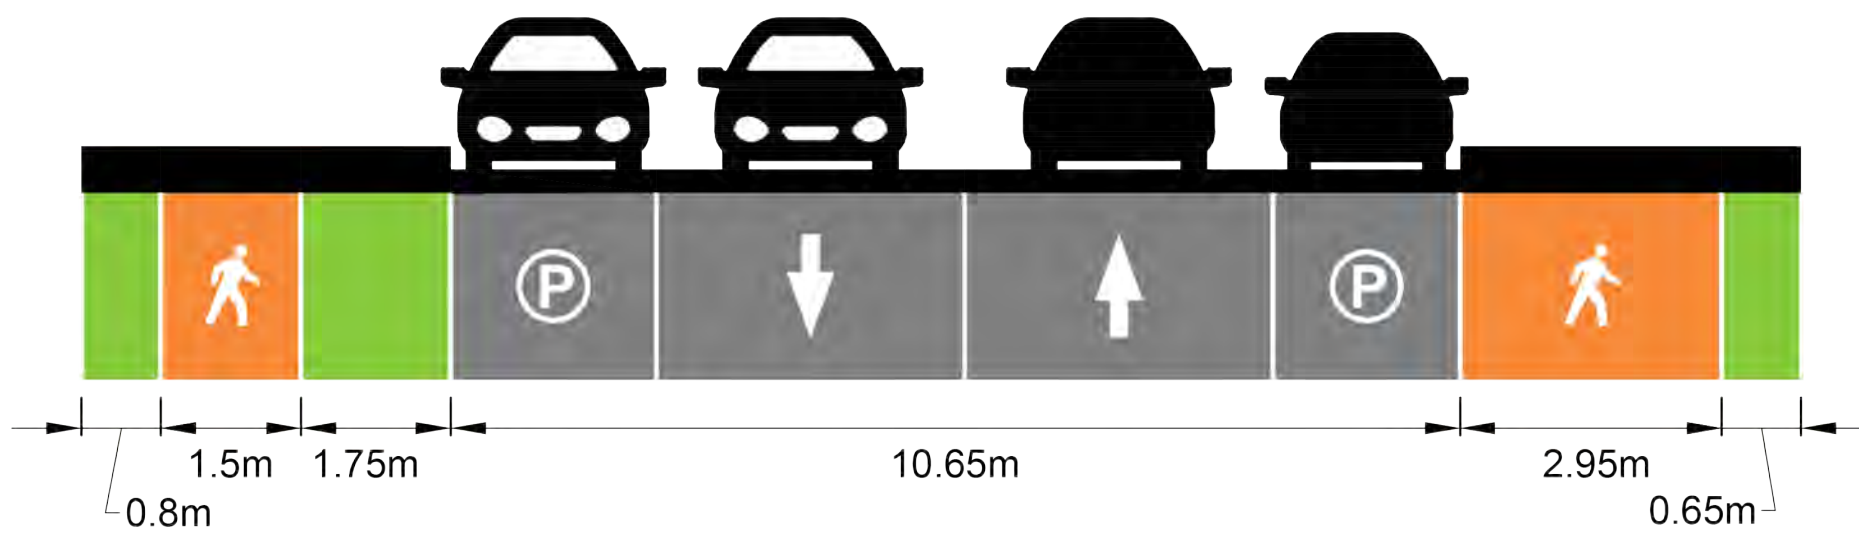

Parking Bays

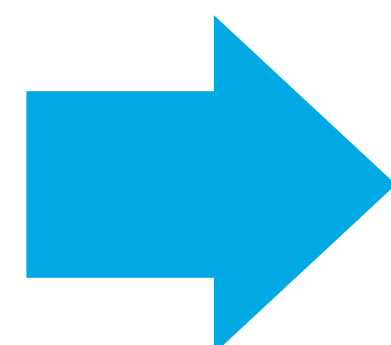

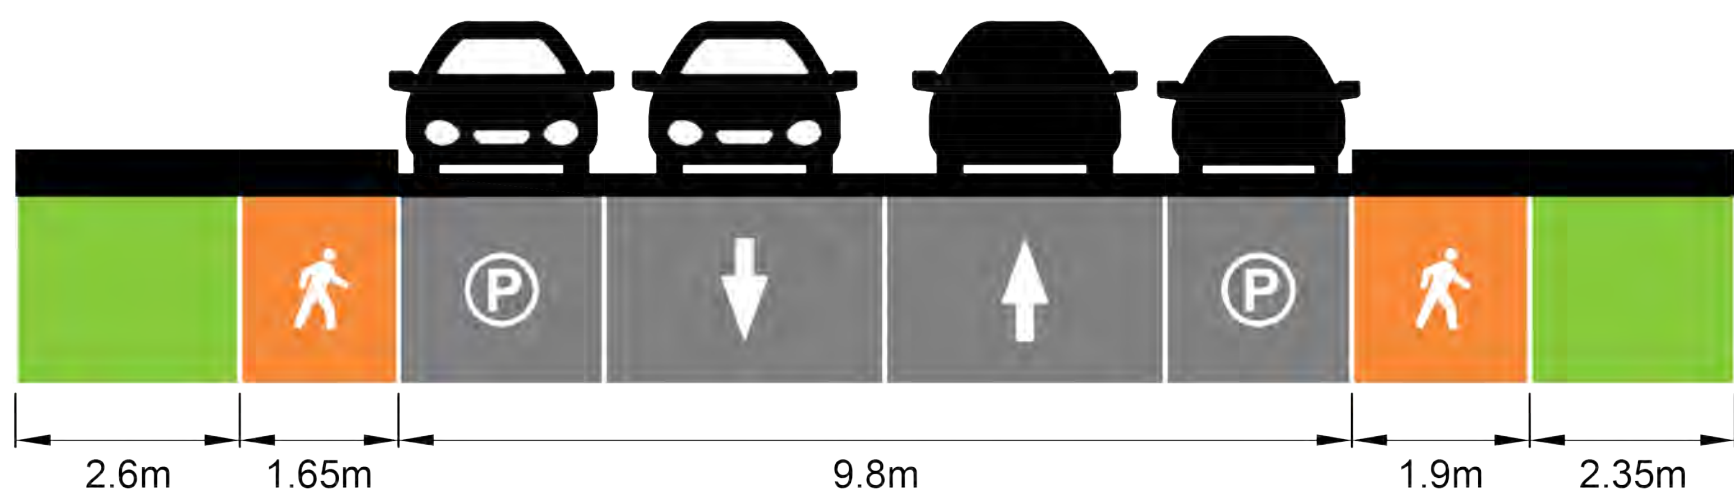

Raised Crosswalks

EXISTING & PROPOSED CROSS SECTIONS

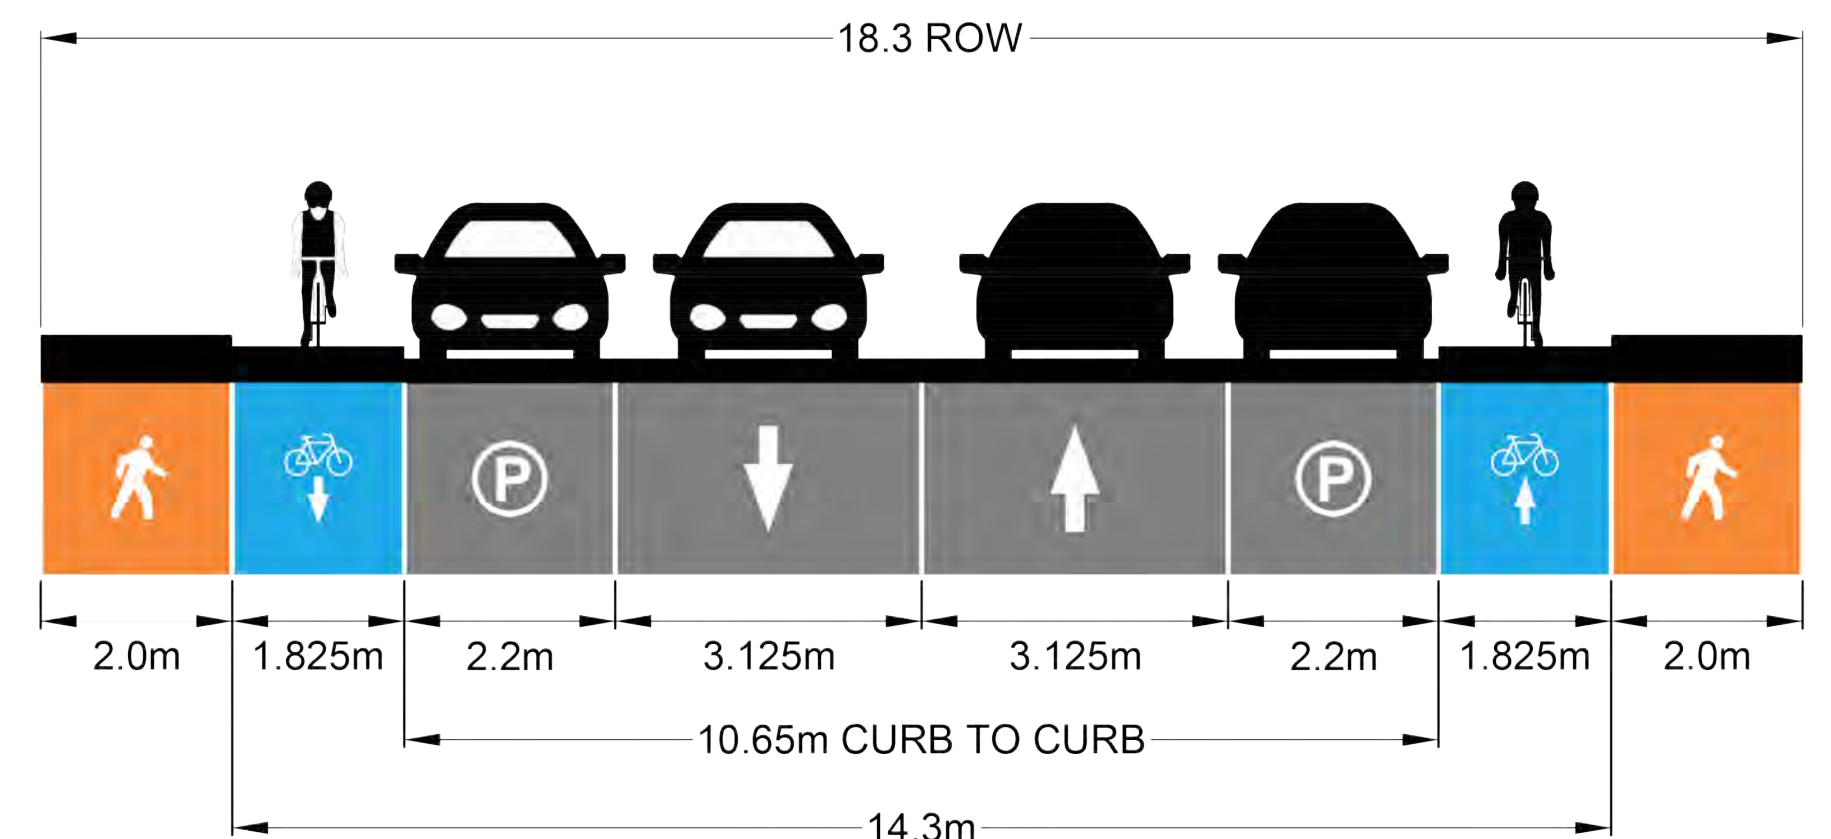

EXISTING TYPICAL CROSS SECTION (GRAFTON ST TO MACAULAY ST)

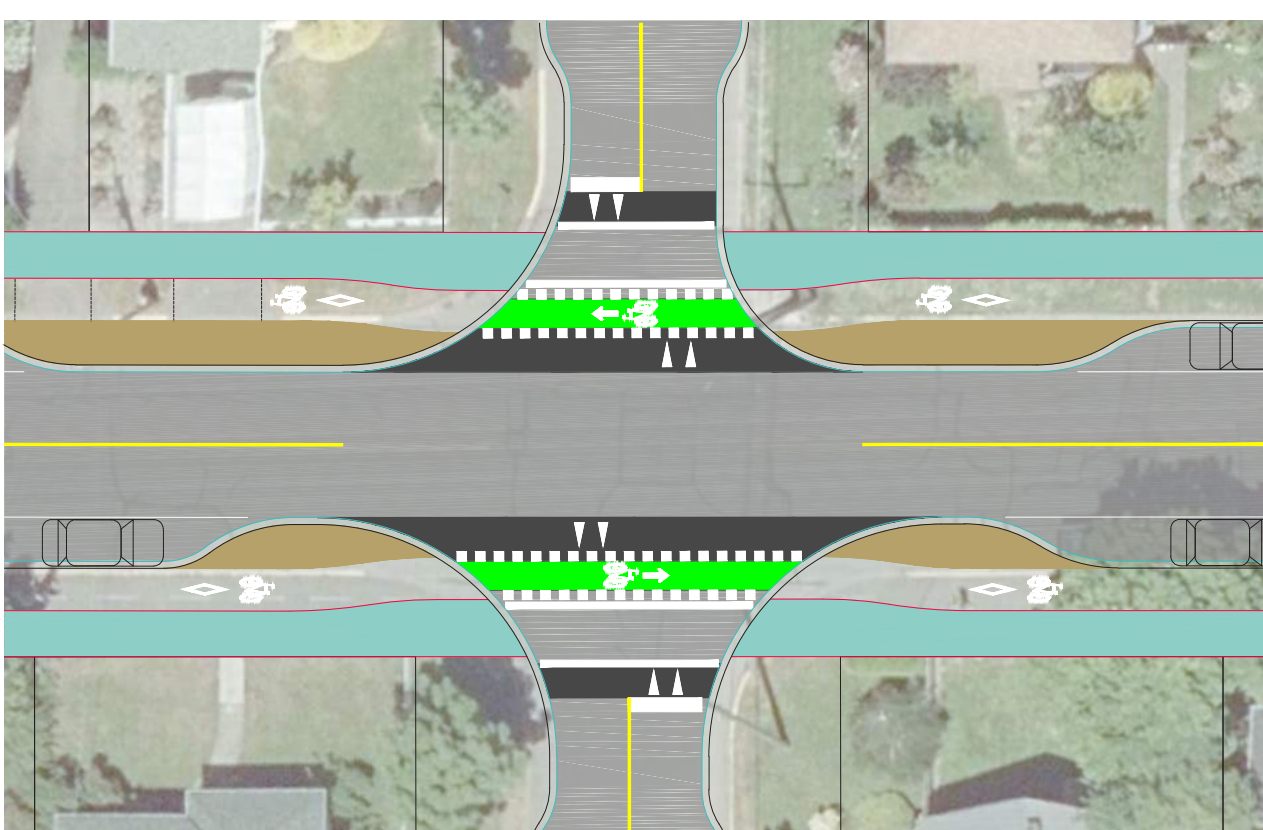

EXISTING TYPICAL CROSS SECTION (PARADISE ST TO HEAD ST)

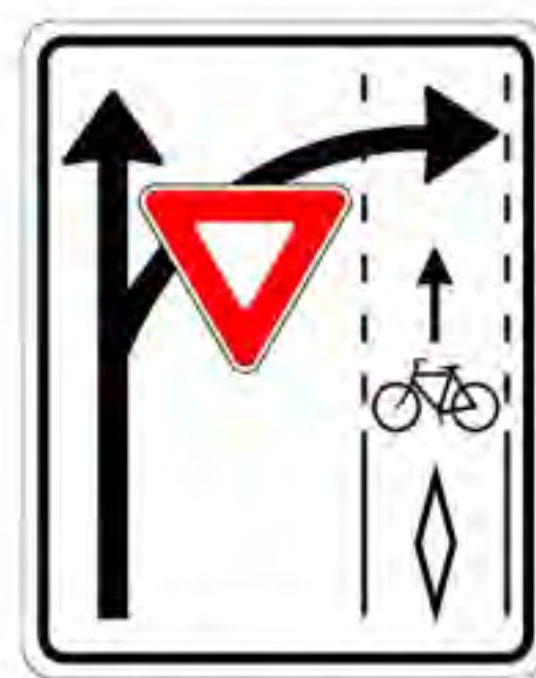

PROPOSED TYPICAL CROSS SECTION

DESIGNING FOR SAFETY

Protected Intersection Design

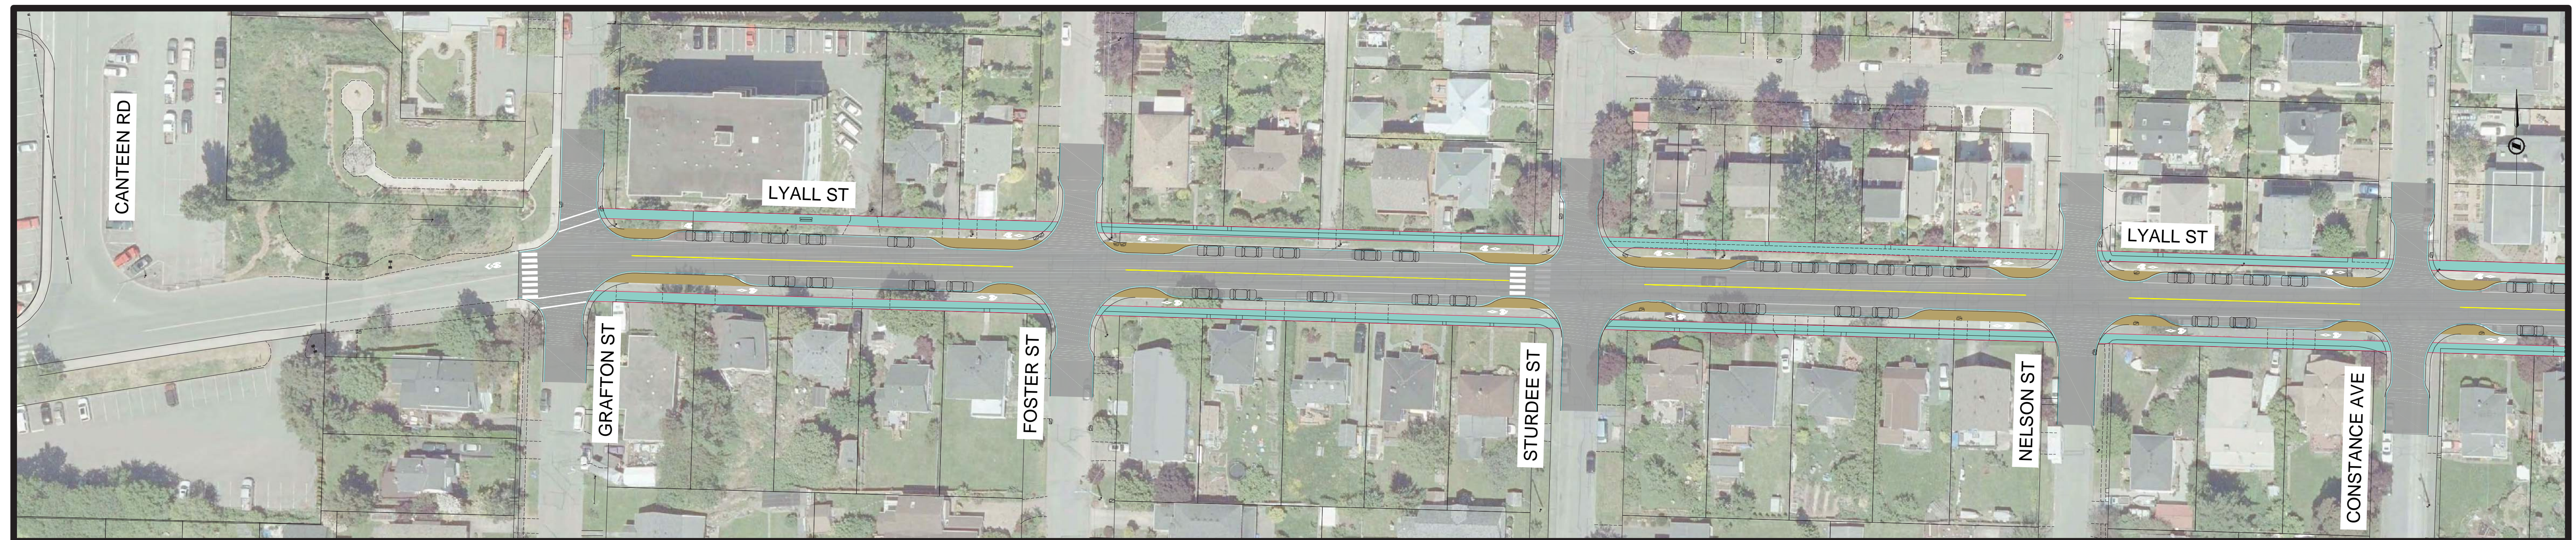

Sample
Yield
Signage

Cycle Track Treatment
Churchill Ave, Ottawa

Preliminary Design - Canteen Rd to Constance Ave

WHAT IS STAYING THE SAME?

- Number of travel lanes
- Parking on both sides
- Sidewalks on each side
- Driveways

WHAT IS CHANGING?

- Barrier curb between parking and bicycle/pedestrian area
- New wider sidewalk on both sides
- New bicycle lanes separated from vehicles (moving & parked)
- Curb extensions at intersections to reduce speeds and crossing distances for pedestrians
- Speed limit reduced to 30 km/h

Preliminary Design - Constance Ave to Heald Ave

WHAT IS STAYING THE SAME?

- Number of travel lanes
- Parking on both sides
- Sidewalks on each side
- Driveways

WHAT IS CHANGING?

- Barrier curb between parking and bicycle/pedestrian area
- New wider sidewalk on both sides
- New bicycle lanes separated from vehicles (moving & parked)
- Curb extensions at intersections to reduce speeds and crossing distances for pedestrians
- Speed limit reduced to 30 km/h

Preliminary Design - Heald Ave to Lampson St

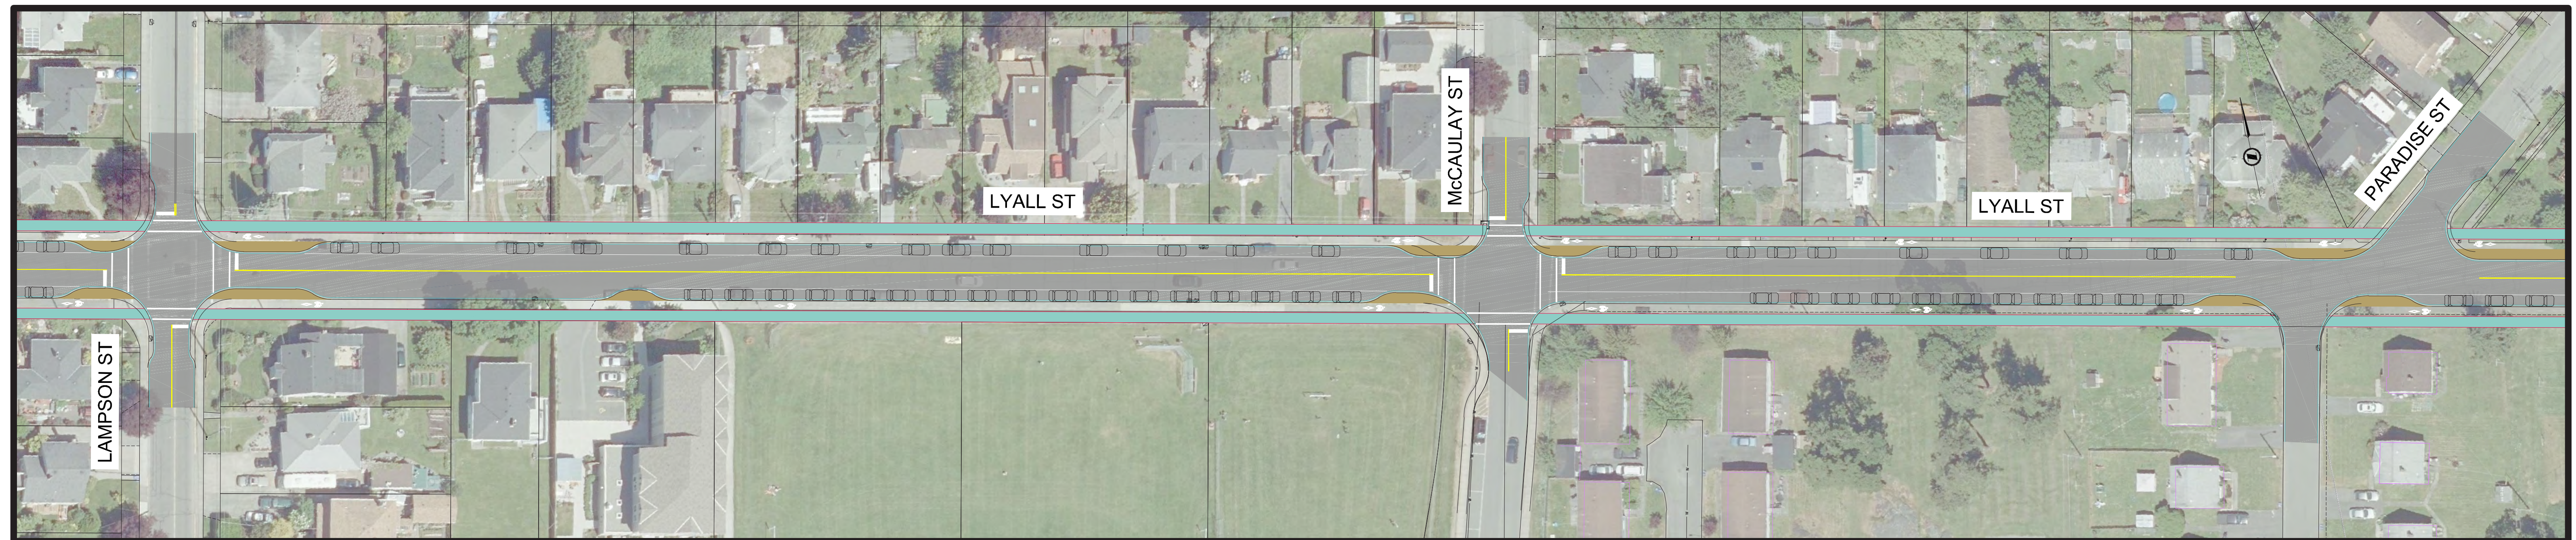

WHAT IS STAYING THE SAME?

- Number of travel lanes
- Parking on both sides
- Sidewalks on each side
- Driveways

WHAT IS CHANGING?

- Barrier curb between parking and bicycle/pedestrian area
- New wider sidewalk on both sides
- New bicycle lanes separated from vehicles (moving & parked)
- Curb extensions at intersections to reduce speeds and crossing distances for pedestrians
- Speed limit reduced to 30 km/h

Preliminary Design - Lampson St to Paradise St

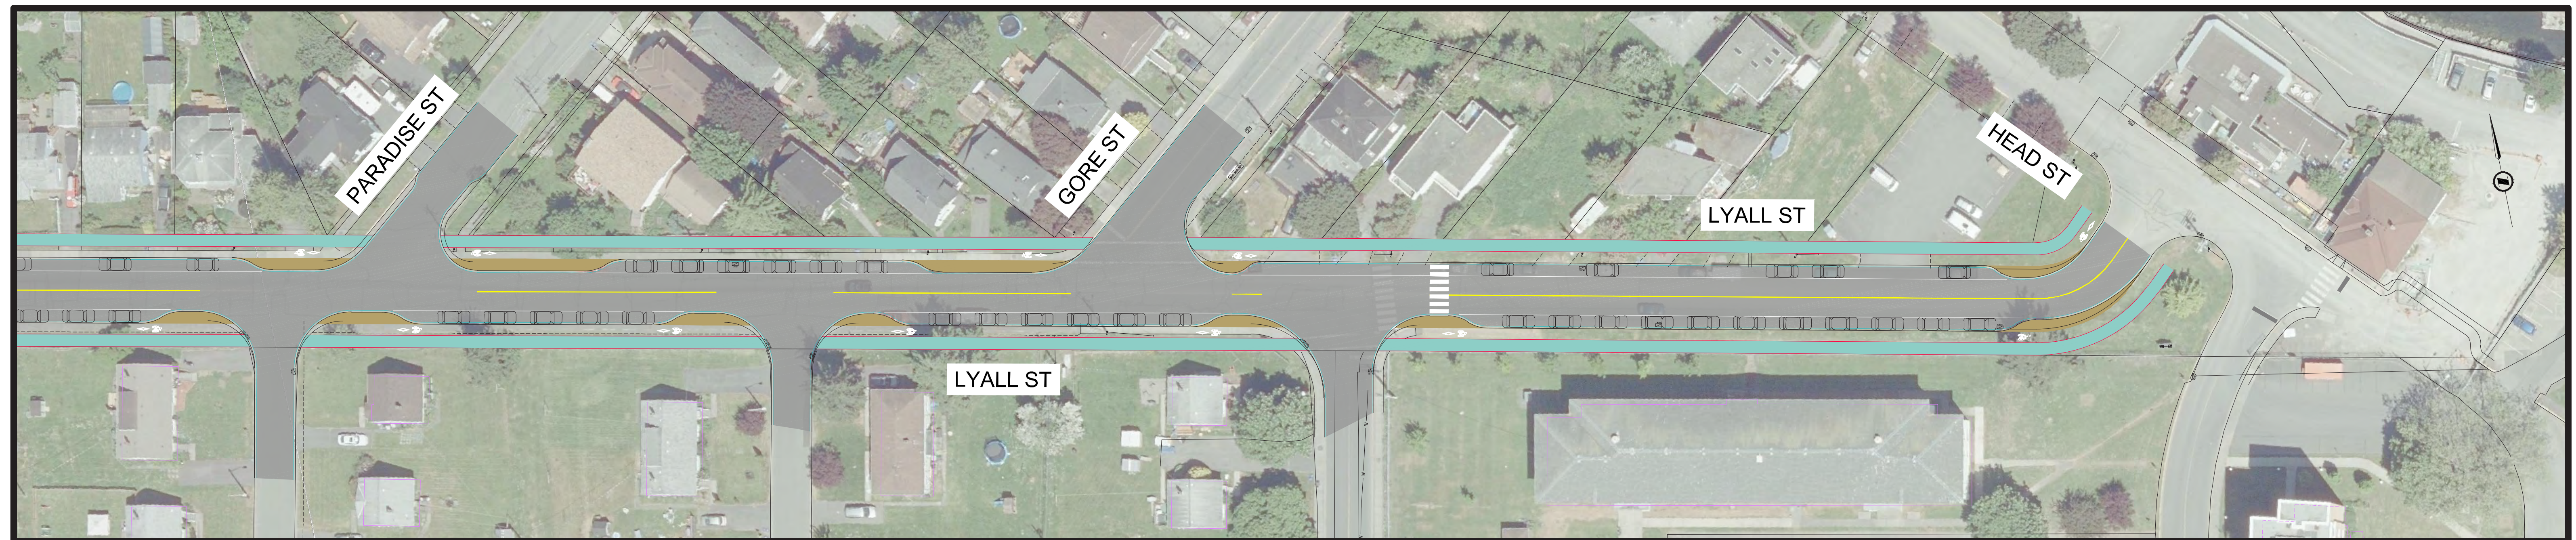

WHAT IS STAYING THE SAME?

- Number of travel lanes
- Parking on both sides
- Sidewalks on each side
- Driveways
