

GREEN BUILDING CHECKLIST

The purpose of this Checklist is to make property owners and developers aware of specific green features that can be included in new developments to reduce their carbon footprints to help create a more sustainable community.

Creating walkable neighbourhoods, fostering green building technologies, making better use of our limited land base and ensuring that new development is located close to services, shops and transit are some of the means of achieving sustainability.

The Checklist which follows focuses on the use of **Green Technologies** in new buildings and major renovations. The Checklist is not a report card, it is a tool to help identify how your project can become 'greener' and to demonstrate to Council how your project will help the Township of Esquimalt meet its sustainability goals. It is not expected that each development will include all of the ideas set out in this list but Council is looking for a strong commitment to green development.

There are numerous green design standards, for example, Built Green BC; LEED ND; Living Building Challenge; Green Shores; Sustainable Sites Initiative. Esquimalt is not directing you to follow any particular standard, however, you are strongly encouraged to incorporate as many green features as possible into the design of your project .

As you review this checklist, if you have any questions please contact **Development Services at 250.414.7108** for clarification.

**New development is essential to Esquimalt.
We look forward to working with you
to ensure that development is
as green and sustainable as possible.**

Other documents containing references to building and site design and sustainability, which you are advised to review, include:

- Esquimalt's Official Community Plan
- Development Protocol Policy
- Esquimalt's Pedestrian Charter
- Tree Protection Bylaw No. 2664
- A Sustainable Development Strategic Plan for the Township of Esquimalt

“One-third of Canada’s energy use goes to running our homes, offices and other buildings. The federal government’s Office of Energy Efficiency (Natural Resources Canada) reports that a corresponding one-third of our current greenhouse gas (GHG) emissions come from the built environment.”
 [Green Building and Development as a Public Good, Michael Buzzelli, CPRN Research Report June 2009]

Please answer the following questions and describe the green and innovative features of your proposed development. Depending on the size and scope of your project, some of the following points may not be applicable.

Green Building Standards

Both energy use and emissions can be reduced by changing or modifying the way we build and equip our buildings.

- 1 Are you building to a recognized green building standard? Yes No
 If yes, to what program and level?
- 2 If not, have you consulted a Green Building or LEED consultant to discuss the inclusion of green features? Yes No
- 3 Will you be using high-performance building envelope materials, rainscreen siding, durable interior finish materials or safe to re-use materials in this project? Yes No
 If so, please describe them. WOOD FLOORING, GRANITE COUNTERS
TILE FLOORING, WOOD CABINETS
- 4 What percentage of the existing building[s], if any, will be incorporated into the new building? %
- 5 Are you using any locally manufactured wood or stone products to reduce energy used in the transportation of construction materials? Please list any that are being used in this project.
LOCAL CEDAR FOR EXTERIOR
- 6 Have you considered advanced framing techniques to help reduce construction costs and increase energy savings? Yes No
- 7 Will any wood used in this project be eco-certified or produced from sustainably managed forests? If so, by which organization? PEFC CERTIFIED LUMBER THROUGH W. FRASER MILL
 For which parts of the building (e.g. framing, roof, sheathing etc.)? _____
- 8 Can alternatives to Chlorofluorocarbons and Hydro-chlorofluorocarbons which are often used in air conditioning, packaging, insulation, or solvents] be used in this project? If so, please describe these. _____ Yes No
- 9 List any products you are proposing that are produced using lower energy levels in manufacturing.

- 10 Are you using materials which have a recycled content [e.g. roofing materials, interior doors, ceramic tiles or carpets]? Yes No
- 11 Will any interior products [e.g. cabinets, insulation or floor sheathing] contain formaldehyde? Yes No

Water Management

The intent of the following features is to promote water conservation, re-use water on site, and reduce storm water run-off.

Indoor Water Fixtures

- 12 Does your project exceed the BC Building Code requirements for public lavatory faucets and have automatic shut offs? Yes No
- 13 For commercial buildings, do flushes for urinals exceed BC Building Code requirements? Yes N/A
- 14 Does your project use dual flush toilets and do these exceed the BC Building Code requirements? Yes No
- 15 Does your project exceed the BC Building Code requirements for maximum flow rates for private showers? Yes No
- 16 Does your project exceed the BC Building Code requirements for flow rates for kitchen and bathroom faucets? Yes No

Storm Water

- 17 If your property has water frontage, are you planning to protect trees and vegetation within 60 metres of the high water mark? [Note: For properties located on the Gorge Waterway, please consult Sections 7.1.2.1 and 9.6 of the Esquimalt Official Community Plan.] Yes No N/A
- 18 Will this project eliminate or reduce inflow and infiltration between storm water and sewer pipes from this property? Yes No N/A
- 19 Will storm water run-off be collected and managed on site (rain gardens, wetlands, or ponds) or used for irrigation or re-circulating outdoor water features? If so, please describe. _____
 _____ Yes No N/A
- 20 Have you considered storing rain water on site (rain barrels or cisterns) for future irrigation uses? RAIN BARRELS Yes No N/A
- 21 Will surface pollution into storm drains will be mitigated (oil interceptors, bio-swales)? If so, please describe. _____
 _____ Yes No N/A
- 22 Will this project have an engineered green roof system or has the structure been designed for a future green roof installation? Yes No N/A
- 23 What percentage of the site will be maintained as naturally permeable surfaces? _____
60 %

Waste water

- 24 For larger projects, has Integrated Resource Management (IRM) been considered (e.g. heat recovery from waste water or onsite waste water treatment)? If so, please describe these. _____
 _____ Yes No N/A

Natural Features/Landscaping

The way we manage the landscape can reduce water use, protect our urban forest, restore natural vegetation and help to protect the watershed and receiving bodies of water.

- 25 Are any healthy trees being removed? If so, how many and what species? Yes No N/A
2 DEAD OR IN BLD ENVELOPE / CEDAR
 Could your site design be altered to save these trees?
 Have you consulted with our Parks Department regarding their removal? YES

Air Quality

The following items are intended to ensure optimal air quality for building occupants by reducing the use of products which give off gases and odours and allowing occupants control over ventilation.

46	Will ventilation systems be protected from contamination during construction and certified clean post construction?	<input checked="" type="radio"/> Yes	<input type="radio"/> No	N/A
47	Are you using any natural, non-toxic, water soluble or low-VOC [volatile organic compound] paints, finishes or other products? If so, please describe. _____	<input checked="" type="radio"/> Yes	<input type="radio"/> No	N/A
48	Will the building have windows that occupants can open?	<input checked="" type="radio"/> Yes	<input type="radio"/> No	N/A
49	Will hard floor surface materials cover more than 75% of the liveable floor area?	<input checked="" type="radio"/> Yes	<input type="radio"/> No	N/A
50	Will fresh air intakes be located away from air pollution sources?	<input checked="" type="radio"/> Yes	<input type="radio"/> No	N/A

Solid Waste

Reuse and recycling of material reduces the impact on our landfills, lowers transportation costs, extends the life-cycle of products, and reduces the amount of natural resources used to manufacture new products.

51	Will materials be recycled during demolition of existing buildings and structures? If so, please describe. <u>METALS, PLASTICS, ETC</u>	<input checked="" type="radio"/> Yes	<input type="radio"/> No	N/A
52	Will materials be recycled during the construction phase? If so, please describe. <u>DRYWALL / PLASTICS / METAL / CARDBOARD</u>	<input checked="" type="radio"/> Yes	<input type="radio"/> No	N/A
53	Does your project provide enhanced waste diversion facilities i.e. on-site recycling for cardboard, bottles, cans and or recyclables or on-site composting?	<input type="radio"/> Yes	<input checked="" type="radio"/> No	N/A
54	For new commercial development, are you providing waste and recycling receptacles for customers?	<input type="radio"/> Yes	<input type="radio"/> No	<input checked="" type="radio"/> N/A

Green Mobility

The intent is to encourage the use of sustainable transportation modes and walking to reduce our reliance on personal vehicles that burn fossil fuels which contributes to poor air quality.

55	Is pedestrian lighting provided in the pathways through parking and landscaped areas and at the entrances to your building[s]?	<input type="radio"/> Yes	<input type="radio"/> No	<input checked="" type="radio"/> N/A
56	For commercial developments, are pedestrians provided with a safe path[s] through the parking areas and across vehicles accesses?	<input type="radio"/> Yes	<input type="radio"/> No	<input checked="" type="radio"/> N/A
57	Is access provided for those with assisted mobility devices?	<input type="radio"/> Yes	<input checked="" type="radio"/> No	N/A
58	Are accessible bike racks provided for visitors?	<input type="radio"/> Yes	<input checked="" type="radio"/> No	N/A
59	Are secure covered bicycle parking and dedicated lockers provided for residents or employees?	<input type="radio"/> Yes	<input checked="" type="radio"/> No	N/A
60	Does your development provide residents or employees with any of the following features to reduce personal automobile use [check all that apply]: <input type="checkbox"/> transit passes <input type="checkbox"/> car share memberships <input type="checkbox"/> shared bicycles for short term use <input type="checkbox"/> weather protected bus shelters <input type="checkbox"/> plug-ins for electric vehicles			

Is there something unique or innovative about your project that has not been addressed by this Checklist? If so, please add extra pages to describe it.
