

A4.1 Notification and Invitation

Excerpt from the Current Community Newsletter Fall 2018

Corridor Design: Lampson and Lyall

During July 2018, the Township of Esquimalt undertook a comprehensive study of its transportation system.

The overall goal of the study is to improve comfort and safety for all travel modes on the corridors—particularly cyclists and pedestrians—by improving active transportation facilities while retaining acceptable traffic movement and minimizing impacts on neighbourhood parking.

As part of this study, two online surveys were developed to gather input from residents on the Lampson Street and Lyall Street corridors. Some 600 people participated in the survey.

The surveys focused on the community's attitudes and preferences with respect to active transportation infrastructure on the corridors.

Data from the surveys will now be used to inform infrastructure design, including on-street parking, bike lanes, shared lane markings, and sidewalks.

An open house will be held on Thursday November 22 to present design renderings for Lyall Street. Engineering staff members and consultants will be on hand to answer questions.

What: Lyall Street Corridor Open House

Where: Council Chambers, Municipal Hall

When: Thursday Nov. 22, 2018, 6:30 - 8:30 p.m.

Have your say on transportation: Lyall Street

The Township of Esquimalt is undertaking a comprehensive study of its transportation system. As part of this study, we are seeking your input on the Lyall Street corridor through a survey.

The survey focuses on the community's attitudes with respect to active transportation infrastructure on the corridor as well as preferences for transportation infrastructure.

The overall goal of the study is to improve comfort and safety for all travel modes – particularly cyclists and pedestrians – by improving active transportation facilities, while retaining acceptable vehicular traffic conditions and minimizing impacts on neighbourhood parking.

Each survey takes about 5-10 minutes to complete and all responses will be kept confidential and anonymous.

The survey is available online at www.esquimalt.ca (see the news item under "What's Happening" on the home page). If you are unable to complete the survey online, hard copies of the survey are available for pick up and drop off in the Engineering and Public Works Department on the 3rd floor of Municipal Hall.

Thank you for providing your input by July 25, 2018.
