

GREEN BUILDING CHECKLIST

The purpose of this Checklist is to make property owners and developers aware of specific green features that can be included in new developments to reduce their carbon footprints to help create a more sustainable community.

Creating walkable neighbourhoods, fostering green building technologies, making better use of our limited land base and ensuring that new development is located close to services, shops and transit are some of the means of achieving sustainability.

The Checklist which follows focuses on the use of **Green Technologies** in new buildings and major renovations. The Checklist is not a report card, it is a tool to help identify how your project can become 'greener' and to demonstrate to Council how your project will help the Township of Esquimalt meet its sustainability goals. It is not expected that each development will include all of the ideas set out in this list but Council is looking for a strong commitment to green development.

There are numerous green design standards, for example, Built Green BC; LEED ND; Living Building Challenge; Green Shores; Sustainable Sites Initiative. Esquimalt is not directing you to follow any particular standard, however, you are strongly encouraged to incorporate as many green features as possible into the design of your project .

As you review this checklist, if you have any questions please contact **Development Services** at 250.414.7108 for clarification.

**New development is essential to Esquimalt.
We look forward to working with you
to ensure that development is
as green and sustainable as possible.**

Other documents containing references to building and site design and sustainability, which you are advised to review, include:

- Esquimalt's Official Community Plan
- Development Protocol Policy
- Esquimalt's Pedestrian Charter
- Tree Protection Bylaw No. 2664
- A Sustainable Development Strategic Plan for the Township of Esquimalt

Adopted on January 10th, 2011

"One-third of Canada's energy use goes to running our homes, offices and other buildings. The federal government's Office of Energy Efficiency (Natural Resources Canada) reports that a corresponding one-third of our current greenhouse gas (GHG) emissions come from the built environment."

[Green Building and Development as a Public Good, Michael Buzzelli, CPRN Research Report June 2009]

Please answer the following questions and describe the green and innovative features of your proposed development. Depending on the size and scope of your project, some of the following points may not be applicable.

Green Building Standards

Both energy use and emissions can be reduced by changing or modifying the way we build and equip our buildings.

1	Are you building to a recognized green building standard? If yes, to what program and level?	BUILT GREEN	Yes ✓	No
2	If not, have you consulted a Green Building or LEED consultant to discuss the inclusion of green features?		Yes	No
3	Will you be using high-performance building envelope materials, rainscreen siding, durable interior finish materials or safe to re-use materials in this project? If so, please describe them. TO MEET NECB 2017		Yes ✓	No
4	What percentage of the existing building[s], if any, will be incorporated into the new building?		N/A	%
5	Are you using any locally manufactured wood or stone products to reduce energy used in the transportation of construction materials? Please list any that are being used in this project. TBD DURING FURTHER DETAILED DESIGN			
6	Have you considered advanced framing techniques to help reduce construction costs and increase energy savings?		Yes ✓	No
7	Will any wood used in this project be eco-certified or produced from sustainably managed forests? If so, by which organization? TBD DURING FURTHER DETAILED DESIGN For which parts of the building (e.g. framing, roof, sheathing etc.)? _____			
8	Can alternatives to Chlorofluorocarbon's and Hydro-chlorofluorocarbons which are often used in air conditioning, packaging, insulation, or solvents] be used in this project? If so, please describe these. _____ THE GOAL WILL BE TO MINIMIZE USE OF CFC AND HCFC - TBD DURING FURTHER DETAILED DESIGN		Yes ✓	No
9	List any products you are proposing that are produced using lower energy levels in manufacturing. TBD DURING FURTHER DETAILED DESIGN _____			
10	Are you using materials which have a recycled content [e.g. roofing materials, interior doors, ceramic tiles or carpets]?		Yes ✓	No
11	Will any interior products [e.g. cabinets, insulation or floor sheathing] contain formaldehyde?		Yes	No ✓

Indoor Water Fixtures

Storm Water

Waste water

Natural Features/Landscaping

25 Are any healthy trees being removed? If so, how many and what species?

Page 3 of 5

26	Will this project add new trees to the site and increase our urban forest? If so, how many and what species? <u>REFER TO LANDSCAPE PLAN</u>	Yes 	No	N/A
27	Are trees [existing or new] being used to provide shade in summer or to buffer winds? <u>AS POSSIBLE / PRACTICAL</u>	Yes 	No	N/A
28	Will any existing native vegetation on this site be protected? If so, please describe where and how. _____	Yes	No	N/A
29	Will new landscaped areas incorporate any plant species native to southern Vancouver Island?	Yes 	No	N/A
30	Will xeriscaping (i.e. the use of drought tolerant plants) be utilized in dry areas?	Yes 	No	N/A
31	Will high efficiency irrigation systems be installed (e.g. drip irrigation; 'smart' controls)?	Yes 	No	N/A
32	Have you planned to control invasive species such as Scotch broom, English ivy, Himalayan and evergreen blackberry growing on the property?	Yes	No	N/A
33	Will topsoil will be protected and reused on the site?	Yes 	No	N/A

Energy Efficiency

Improvements in building technology will reduce energy consumption and in turn lower greenhouse gas [GHG] emissions. These improvements will also reduce future operating costs for building occupants.

34	Will the building design be certified by an independent energy auditor/analyst? If so, what will the rating be? <u>TBD DURING FURTHER DETAILED DESIGN</u>	Yes 	No	N/A
35	Have you considered passive solar design principles for space heating and cooling or planned for natural day lighting?	Yes 	No	N/A
36	Does the design and siting of buildings maximize exposure to natural light? What percentage of interior spaces will be illuminated by sunlight? <u>_TBC_%</u>	Yes 	No	N/A
37	Will heating and cooling systems be of enhanced energy efficiency (ie. geothermal, air source heat pump, solar hot water, solar air exchange, etc.). If so, please describe. <u>TBD DURING FURTHER DETAILED DESIGN</u> If you are considering a heat pump, what measures will you take to mitigate any noise associated with the pump? _____	Yes	No	N/A
38	Has the building been designed to be solar ready?	Yes 	No	N/A
39	Have you considered using roof mounted photovoltaic panels to convert solar energy to electricity?	Yes 	No	N/A
40	Do windows exceed the BC Building Code heat transfer coefficient standards? <u>TO MEET NECB 2017</u>	Yes	No	N/A
41	Are energy efficient appliances being installed in this project? If so, please describe. <u>ENERGY STAR</u>			
42	Will high efficiency light fixtures be used in this project? If so, please describe. <u>LED</u>	Yes 	No	N/A
43	Will building occupants have control over thermal, ventilation and light levels?	Yes 	No	N/A
44	Will outdoor areas have automatic lighting [i.e. motion sensors or time set]?	Yes 	No	N/A
45	Will underground parking areas have automatic lighting?	Yes 	No	N/A

Air Quality

The following items are intended to ensure optimal air quality for building occupants by reducing the use of products which give off gases and odours and allowing occupants control over ventilation.

46	Will ventilation systems be protected from contamination during construction and certified clean post construction?	Yes	No	N/A
47	Are you using any natural, non-toxic, water soluble or low-VOC [volatile organic compound] paints, finishes or other products? If so, please describe. <u>TBD DURING FURTHER DETAILED DESIGN</u>	Yes	No	N/A
48	Will the building have windows that occupants can open?	Yes	No	N/A
49	Will hard floor surface materials cover more than 75% of the liveable floor area?	Yes	No	N/A
50	Will fresh air intakes be located away from air pollution sources?	Yes	No	N/A

Solid Waste

Reuse and recycling of material reduces the impact on our landfills, lowers transportation costs, extends the life-cycle of products, and reduces the amount of natural resources used to manufacture new products.

51	Will materials be recycled during demolition of existing buildings and structures? If so, please describe. <u>EXPLORING OPTIONS REGARDING MOVING EXISTING HOUSES</u>	Yes	No	N/A
52	Will materials be recycled during the construction phase? If so, please describe. <u>WASTE WOOD, CRATES AND PACKAGING</u>	Yes	No	N/A
53	Does your project provide enhanced waste diversion facilities i.e. on-site recycling for cardboard, bottles, cans and or recyclables or on-site composting?	Yes	No	N/A
54	For new commercial development, are you providing waste and recycling receptacles for customers?	Yes	No	N/A

Green Mobility

The intent is to encourage the use of sustainable transportation modes and walking to reduce our reliance on personal vehicles that burn fossil fuels which contributes to poor air quality.

55	Is pedestrian lighting provided in the pathways through parking and landscaped areas and at the entrances to your building[s]?	Yes	No	N/A
56	For commercial developments, are pedestrians provided with a safe path[s] through the parking areas and across vehicles accesses?	Yes	No	N/A
57	Is access provided for those with assisted mobility devices?	Yes	No	N/A
58	Are accessible bike racks provided for visitors?	Yes	No	N/A
59	Are secure covered bicycle parking and dedicated lockers provided for residents or employees?	Yes	No	N/A
60	Does your development provide residents or employees with any of the following features to reduce personal automobile use [check all that apply]: <input type="checkbox"/> transit passes <input checked="" type="checkbox"/> car share memberships <input type="checkbox"/> shared bicycles for short term use <input checked="" type="checkbox"/> weather protected bus shelters (BY BC TRANSIT) <input checked="" type="checkbox"/> plug-ins for electric vehicles			

Is there something unique or innovative about your project that has not been addressed by this Checklist? If so, please add extra pages to describe it.
