Dear Resident:

**Re: Stancombe Place Parking Restriction Survey Results**

Thank you for your participation in our request for your input on the subject of restricted parking in the cul-de-sac at the end of Stancombe Place the results of the survey are as follows:

- Of the 19 Stancombe Place residences surveyed, a total of eight responses were received.
- One (1) response in favour of Option No. 1 "No Parking in or within 10m of the cul-de-sac between 7am and 4pm Monday to Friday."
- One (1) response in favour of Option No. 2 "No Parking in or within 10m of the cul-de-sac at any time."
- Six (6) of the responses were in favour of Option No. 3 "Removal of the center island and the furniture within it with no parking restrictions implemented."

Utilizing these responses, Option No. 3 was explored more in depth. Due to the relocation of BC Hydro and Telus infrastructure it is estimated that the cost to carry out this option resides in \$100, 000 to \$200,000 range. It was also confirmed that with the island removed and no parking restrictions in place in the bulb that long wheel based vehicle would still be required to make multi point turning maneuver in order to turn around. There would still be a risk of damage to parked vehicles due to this type of maneuver.

Options 1 and 2 are of fairly small costs and could be absorbed into the Township's operating budget. Option 3 is a fairly significant cost and would have to be funded by either a budget request or local improvement charge. A local improvement charge is charged back to properties that benefit from the improvement. This charge would be applied to the 19 properties of the street over approximately a 20 year period.

Due to the costs associated with Option 3, the Public Works Department would like to ask for your input again as to what your preference would be for this issue. The options are:

Option 1, Option 2 or Option 3. We would like to hear back from you no later than **Friday March 11, 2016**.
